Antenna installation is extremely easy and ensures rapid deployment for large scale projects. Our innovative antenna mount □ ts a wide range of pole diameters and can be easily swapped for right or left side mounts. A single HEX tool is all you need to perform your installation.

Suppressed sidelobe radiation reduces interferences and enables installation in areas with high noise levels. The gain of UltraDish TP antennas is achieved by focusing the signal delivered via the TwistPort waveguide connector. UltraDish TP 380 provides a 24dBi gain and an 8° (-3dB) beamwidth.
